

Assistive Technology

We're a leading supplier of [Assistive Technology](#) equipment and software. We can also provide expert [training](#) to help you get the most out of them.

Assistive technology equipment and software enable disabled and neurodivergent individuals to carry out certain tasks that might otherwise be challenging or impossible. Used to support and enhance their productivity, this technology empowers individuals to independently complete tasks.

Why use us?

We understand that there is a vast range of assistive technology available, and making the right choice can seem overwhelming. This is why we are on-hand to offer advice and guidance to help you find the right solution for you.

Over the years, our team has come to recognise which products suit which difficulties best and have extensive knowledge of every technology. If you ever have any questions or queries, neurobox can answer them.

No matter whether it's workplace adjustments you're looking for or additional assistive technology, we have everything you need in one place. We are proud of our holistic approach that caters to a vast audience and guarantees you'll find what you are looking for.

Types of Assistive Technology Products

There are many different types of assistive technology available that have been designed to help overcome many types of difficulties. Some examples of these are:

- Speech/voice recognition software
- Text-to-speech software
- Note-taking
- Mind-mapping
- Screen readers and magnifiers
- Wireless microphones and transmitters
- keyboards
- visual impairment

Dragon NaturallySpeaking Scripting

We provide a [remote or face-to-face training programme](#) that's tailored to your specific learning style, job role, and challenges. This means you can access the benefits of the technology and effectively apply them to your job role.

Benefits

- Creates customised Dragon voice controls to enable you to perform all the actions needed in any application. This can be crucial in applications that Dragon does not support.
- Adds an additional level of efficiency to applications that Dragon does support by combining multiple processes into one simple voice command.
- Helps those who have difficulty remembering processes or need to reduce the time certain tasks take.
