C-PEN™

READER 2™

Improve student support, maximise learning and free up valuable teacher support time. The C-Pen Reader 2™ supports thousands of students every day at home and at school to read.

The C-Pen Reader 2™ is an assistive reading tool designed for the way you live. From learning to working and reading for pleasure, our high-speed AI-based text recognition software is supported by world dictionaries and word breakdown functions that mean users never have to skip over a word they're struggling with ever again.

Support Neurodivergent Minds

Open Up the World of Words

Literacy has the power to unlock our world. It is one of the base mechanisms by which we work, learn and communicate. But some individuals with neurodiverse differences struggle with the written word, and supporting these unique challenges is part of creating a more neuro-inclusive future for us all and changing the narrative for those with low literacy.

“

“The school felt the ReaderPen™ would considerably enhance the students’ access to learning – being able to read words effectively, independently and discreetly in the classroom. The pens have been hugely successful in English lessons, for reading/ scanning through long extracts and also in Science lessons, where students come across new and challenging scientific vocabulary.” - **Head of English, Ryde Academy**

”

“

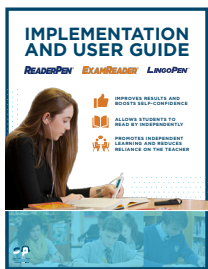

“I use the ReaderPen™ to scan words and then it reads it back to me. I find it to be really good. I want to use it for reading because sometimes when I read or when I speak, I get a little bit anxious and frustrated so it really helps me get better. It helps me stay calm. It’s helped make me be more independent from adults. I don’t need to ask an adult for help with the ReaderPen™.” - **Student, Charlton Park Academy**

”

“I would definitely recommend the ReaderPen™ to other schools for students that you know want to do well but then need that to a bit of support, it has been absolutely brilliant.” - Vicki Ford, English Teacher, Harrow Way Community School

Implementation Guide: A Resource for Dyslexia in the Classroom

Effective reading instruction is the first and best way to improve reading when students struggle. We understand the dedication of educators who teach literacy lessons every day, so we have created a resource designed to aid educators in the implementation of our devices.
